A WAY TO DEVELOP BUSINESS CULTURE AND CREATE IDEAS

Oilympic

IDEA TO PRACTICE

SHARIF UNIVERSITY OF TECHNOLOGY

MORE ABOUT US

Educational and research-oriented Olympiads in both national and international levels are usually held with the aim of screening the elites in academia and industry, while making a comprehensive data bank in specific fields. Oilympic is divided into two education and research-oriented divisions so as to reach the above mentioned goals. We also aim at increasing the motivation of students to work as a team, and let them exploit their creativity to come up with innovative ideas. This is our solution to enrich the industry with amazing new ideas and strongly improve the relationship between academy and industry.

Database

Providing access to a huge data set including more than 10000 young elites of Iranian oil and gas industry.
